Education

The University of Texas at Austin May 2021 - Present
PhD in Computational Science, Engineering, and Mathematics *Austin, TX*
Advisor: Ufuk Topcu | Member of the Autonomous Systems Group

The University of Texas at Austin September 2018 - May 2021
Master of Science in Computational Science, Engineering, and Mathematics *Austin, TX*
Cumulative GPA Over 39 Credits – 4.00

The University of British Columbia September 2013 - May 2018
Bachelor of Applied Science in Engineering Physics, Minor in Honours Mathematics *Vancouver, BC*
Cumulative GPA Over 177 Credits – 91.4% | Co-operative Education Program | Graduated with Distinction

Experience

The University of Texas at Austin – *Graduate Research Assistant* September 2020 - Present
◇ Developing methods to incorporate prior knowledge into reinforcement learning algorithms in order to improve their data efficiency and robustness, as well as to yield policies with verifiable properties.

MDA Systems Ltd. – *Mission Systems Engineering Co-op* May 2017 - August 2017
◇ Performed simulation and analysis of the control algorithms for the European Space Agency's (ESA) ExoMars 2022 rover. Communicated findings and recommendations to the ESA and other international Aerospace companies through a 100+ page technical engineering report.

MDA Systems Ltd. – *Research and Development Co-op* May 2016 - December 2016
◇ Developed, implemented, and validated an image processing algorithm to improve object characterization in the presence of artifacts within synthetic aperture radar images. The algorithm provided a marked performance improvement over the technique previously implemented in company software. Travelled to Ottawa to deliver a 45-minute presentation regarding the results of my work to Defence Research and Development Canada.

D-Wave Systems Inc. – *Processor Development Co-op* January 2015 - May 2015
◇ Designed and executed physics experiments to improve the company's magnetic shielding techniques.
◇ Collaborated with several D-Wave physicists to increase the speed and reduce the error of magnetic field measurement techniques. Measurement standard error values were decreased by a factor of 10.

Publications

* Indicates equal contribution

Designing Minimally-Dependent Multiagent Systems that are Robust to Communication Loss 2022
Mustafa O. Karabag*, **Cyrus Neary***, Ufuk Topcu
Under submission to *The Journal of Autonomous Agents and Multiagent Systems*

Compositional Learning of Dynamical System Models Using Port-Hamiltonian Neural Networks 2022
Cyrus Neary, Ufuk Topcu
Under submission to *The Learning for Dynamics and Control Conference (L4DC) 2023*

Physics-Informed Kernel Embeddings: Integrating Prior System Knowledge with Data-Driven Control 2022
Adam J. Thorpe*, **Cyrus Neary***, Franck Djeumou*, Meeko M. K. Oishi, Ufuk Topcu
Under submission to *The Learning for Dynamics and Control Conference (L4DC) 2023*

Automatic Decomposition of Reward Machines for Decentralized Multiagent Reinforcement Learning 2022
Sophia Smith, **Cyrus Neary**, Ufuk Topcu
Under submission to *The International Conference on Automated Planning and Scheduling (ICAPS) 2023*

Verifiable Reinforcement Learning Systems via Compositionality 2022
Cyrus Neary, Aryaman Singh Samyal, Christos Verginis, Murat Cubuktepe, Ufuk Topcu
Under submission to *The Journal of Artificial Intelligence Research*

Multiscale Heterogeneous Optimal Lockdown Control for COVID-19 Using Geographic Information 2022
Cyrus Neary, Murat Cubuktepe, Niklas Lauffer, Xueting Jin, Alexander J. Phillips, Zhe Xu, Daoqin Tong, and Ufuk Topcu
Scientific Reports

Verifiable and Compositional Reinforcement Learning Systems 2022
Cyrus Neary, Christos Verginis, Murat Cubuktepe, and Ufuk Topcu
The International Conference on Automated Planning and Scheduling (ICAPS) 2022

Neural Networks with Physics-Informed Architectures and Constraints for Dynamical Systems Modeling 2022
Franck Djeumou*, **Cyrus Neary***, Eric Goubault, Sylvie Putot, Ufuk Topcu
The Learning for Dynamics and Control Conference (L4DC) 2022

Taylor-Lagrange Neural Ordinary Differential Equations: Toward Fast Training and Evaluation of Neural ODEs 2022
Franck Djeumou*, **Cyrus Neary***, Eric Goubault, Sylvie Putot, Ufuk Topcu
The International Joint Conference on Artificial Intelligence (IJCAI) 2022

Planning Not to Talk: Multiagent Systems that are Robust to Communication Loss 2022
Mustafa O. Karabag*, **Cyrus Neary***, and Ufuk Topcu
The International Conference on Autonomous Agents and MultiAgent Systems (AAMAS) 2022

Reward Machines for Cooperative Multiagent Reinforcement Learning 2021
Cyrus Neary, Zhe Xu, Bo Wu, and Ufuk Topcu
The International Conference on Autonomous Agents and MultiAgent Systems (AAMAS) 2021

Smooth Convex Optimization using Sub-Zeroth-Order Oracles 2021
Mustafa O. Karabag, **Cyrus Neary**, and Ufuk Topcu
The AAAI Conference on Artificial Intelligence (AAAI) 2021

Oral Presentations

Neural ODEs with Physics-Informed Architectures and Constraints November, 2022
SIAM TX-LA Section Annual Meeting

Taylor-Lagrange Neural ODEs July, 2022
The International Joint Conference on Artificial Intelligence

Verifiable and Compositional Reinforcement Learning Systems June, 2022
The International Conference on Automated Planning and Scheduling

Neural Networks with Physics-Informed Architectures and Constraints April, 2022
SIAM Uncertainty Quantification

Planning not to Talk: Multiagent Systems that are Robust to Communication Loss April, 2022
AFOSR Center of Excellence in Assured Autonomy in Contested Environments

How to Learn to Reach, Walk, Swim and Fly in One Trial October, 2021
Defense Advanced Research Projects Agency

How to Learn to Reach, Walk, Swim and Fly in One Trial October, 2021
Texas Robotics Research Symposium

Reward Machines for Cooperative Multiagent Reinforcement Learning May, 2021
The International Conference on Autonomous Agents and Multiagent Systems

Poster Presentations

Taylor-Lagrange Neural ODEs July, 2022
The International Joint Conference on Artificial Intelligence

Verifiable and Compositional Reinforcement Learning Systems June, 2022
The International Conference on Automated Planning and Scheduling

Neural Networks with Physics-Informed Architectures and Constraints June, 2022
The Learning for Dynamics and Control Conference

Fellowships, Honors, and Awards

Student Scholarship – International Conference on Automated Planning and Scheduling 2022
Student Scholarship – International Conference on Autonomous Agents and Multiagent Systems 2022, 2021
National Initiative for Modeling and Simulation Graduate Research Fellowship 2019
The University of Texas at Austin Graduate Recruitment Fellowship 2018
Carl and Elsie Halterman Scholarship 2018
The University of British Columbia Dean's Honor List 2018, 2017, 2016, 2014
The University of British Columbia Trek Excellence Scholarship 2017, 2016, 2014
Captain C.Y. Wu Scholarship 2017, 2016
MDA Co-op Scholarship 2016
NSERC Industrial Undergraduate Student Research Award 2016, 2015
The University of British Columbia Chancellor's Scholar 2013

Service

Babuška Forum Seminar Series, Co-organizer September 2022 - Present

◇ Organizing a biweekly seminar series to expose PhD students to topics in computational science, engineering, and math.

Volunteer

◇ The International Conference on Autonomous Agents and Multiagent Systems 2021

Reviewer

◇ The International Conference on Automated Planning and Scheduling 2023
◇ IEEE Control Systems Letters 2022
◇ IEEE Conference on Computers, Software & Applications in an Uncertain World 2022
◇ ACM/IEEE International Conference on Cyber-Physical Systems 2021

Other Technical Projects

Ocular Torsion Quantification – *UBC Kinesiology* September 2017 - May 2018

◇ Worked with two other Engineering Physics students to develop a computer algorithm to measure eye torsion from video recordings. This algorithm is of specific interest to researchers in UBC's Sensorimotor Physiology Laboratory.

UAS Flight Navigation and Collision Avoidance – *Aeriosense Technologies* September 2016 - May 2017

◇ Developed an autonomous unmanned aircraft system (UAS) with two other Engineering Physics Students. The system used stereo cameras and onboard processing to navigate and avoid collisions with obstacles.

Electrical Engineering Team Leader – *Formula UBC Engineering Design Team* September 2013 - September 2017

◇ Responsible for the design and fabrication of power distribution, sensor data acquisition, and electronically actuated systems onboard the Formula UBC racecar. The team creates a new car annually to compete against other universities in the international Formula SAE competition.

Autonomous Robot Competition – *UBC Engineering Physics* May 2015 - August 2015

◇ Worked with three other Engineering Physics students to design, prototype, and test a fully autonomous robot that competed in the 2015 UBC Engineering Physics robot competition.
